

JAWOR-PARKIET.PL[®]

WOODEN FLOORING MANUFACTURER

JAWOR-PARKIET.PL[®]

WOODEN FLOORING MANUFACTURER

We have been creating our products with passion since 1991 in a family business in Warmia and Masuria – the green heart of Poland. It is from there that our wooden floors of the highest quality are sent to various places all around the world.

The products showcase our domestic raw material, modern technology, and world-class design. Jawor-Parkiet floors represent traditional craftsmanship and the future of interior design.

We are proud of the fact that the Jawor-Parkiet received in 2020 and 2021 “Teraz Polska” Award, for wooden floors lines: FertigDeska, FertigDeska Luxury and Retro Collection.

In pursuit of excellence, since 1991

Our story began in Nowe Miasto Lubawskie — a place where nature has always set the rhythm of work, and respect for raw materials forms the foundation of every decision. From a family-run workshop producing wooden floor mosaics to the birth of a brand built on craftsmanship and quality, which today holds an undisputed leading position in the Polish wooden flooring market. 35 years of Jawor-Parkiet is the story of people who believe in the value of work carried out with passion, responsibility, and respect for nature.

1991

Launch of „**PD JAWOR**”, specializing in the production of wooden floor mosaic.

2003

Construction begins on a new facility dedicated to the production of **engineered wooden flooring**.

2005

Introduction of the **FertigDeska** and **FertigParkiet** collections of finished, multi-layer wood floors.

2011

Launch of **Color Inspiration** — a collection of floors inspired by the Italian landscape.

2015-2016

Investment in a modern **Schroeder** profiling line and the premiere of the **Chevron** collection — French-patterned wooden floors.

2017

Premiere of the **Retro Collection** — a series of handcrafted, aged wood floors.

2018

Opening of the **first Jawor-Parkiet Showroom** in Krakow, marking the beginning of a nationwide showroom network.

2018

Jawor-Parkiet expands its distribution network into **China**.

2020

"**Teraz Polska**" Emblem awarded to FertigDeska and FertigDeska Luxury, followed by the Retro Collection.

2021

Development of the proprietary, revolutionary **Fusion Hybrid** coating.

2022

Launch of the "Podłogi z Pazurem" ambassador campaign featuring Edyta and Cezary Pazura.

2022

The inaugural edition of the **Jawor-Parkiet Designers Weekend** — a signature event for architects and interior designers.

2024

Construction of a modern warehouse for finished products.

2024

Opening of the **Jawor-Parkiet Design Space** at the production plant in Nowe Miasto Lubawskie.

2025

Inauguration of the **Ambassador Program** featuring 11 architects from across Poland.

2025

Premiere of the new flooring brand **Lignari**, combining traditional craftsmanship, design, and cutting-edge technology.

Multi-layered flooring

The right choice for many years

Wooden floorboards and parquet flooring have adorned Polish houses for generations. They are captivating thanks to their natural beauty and tempting due to their innovative functionality. However, choosing the right flooring is an important decision for many years. Finished two-layer wooden flooring, such as FertigDeska or FertigParkiet, with the top layer being up to 6 mm thick, is the right solution that can meet the expectations of the most demanding users. Thanks to this feature, this type of flooring has been extremely popular among customers for years.

Wooden flooring and underfloor heating - a couple of things that you should keep in mind

Wooden flooring is a very durable, ecological, and hygroscopic material. Its aesthetic values and a wide range of decors and formats, as well as functional advantages, make it the best choice.

As a natural raw material, wood is an excellent solution for individuals suffering from allergies. It is easy to keep it clean as it does not accumulate dust. It is also pleasant to the touch, warm and delicate. Additionally, it does not cause any noise and, when maintained properly, it will serve you for many years. Using wooden floorboards and parquet over underfloor heating is becoming an increasingly popular solution.

Wooden flooring is a reasonable and noteworthy alternative to floor tiles, panels, or carpets. You should remember that Jawor-Parkiet floors with a two-layer structure are recommended for use with underfloor heating.

JAWOR-PARKIET ON THE WALL

The world is upside down!

The wood from the floor creeps onto the walls and ceilings, decorates bed headboards and wardrobe doors. Hard by nature, it creates the impression of softness and coziness.

We are **ALL FOR IT!**

TRENDY

Good design combines the creator's vision and practicality. This is where the needs for aesthetic effects and a simpler world meet. The goal of the design process is to ensure that Jawor-Parkiet's floors evoke positive emotions, such as admiration, while at the same time offering functionality that users can enjoy for years to come.

220[®] LUXURY

new dimension of floor design

We should all pay attention to the tiniest details in life, savor the taste of our favorite wine, get dazzled by the charms of the Cote d'Azur while staying on a yacht moored in the port of Cannes, or eat oysters in a seaside cafe overlooking the Italian village Positano.

For lovers of beautiful interiors, FertigDeska Luxury is like Tiffany & Co. jewelry for Holly Golightly in the famous Breakfast at Tiffany's, like the Monaco Grand Prix for a Formula 1 fan or like Christian Louboutin's heels for a true fashion lover.

In theory, you could do without this incredible flooring, but having it and treading on a polished, smooth, and the brushed surface of warm wood gives a sense of luxury and unique comfort. Everyday contact with beauty and the perfect form of our products, which we provide thanks to the use of extra-long boards, make life more beautiful.

Available in following dimensions:

**DESIGN
EXPERIENCE**

FertigDeska Design Experience

FertigDeska Design Experience is a line of short floorboards for architects. The boards have lengths of 590 and 600 mm, 750 mm in the Design Experience Maxi version and 900 mm in the Design Experience Maxi+ version.

The uniform dimension of the individual floor elements and the right and left tongues are perfect for freeing the creativity of interior designers and decorators, making it possible to create any pattern, such as the classic herringbone, squares, or ladders. These patterns guarantee a unique effect that is bound to catch everyone's attention.

ZERO WASTE

collection

Wooden flooring not only for ECO freaks

Zero Waste is a form of a certain manifesto and a message to the customer - the greatest value of wood flooring lies in its natural beauty. This collection is a return to nature. It exposes the imperfections of wood and transforms the natural flaws of the raw material into its advantages.

The colours of elements

The colours in the collection are inspired by the colours of nature and the elements. It features soft beiges, natural and deep browns, as well as subdued white.

Both the photos used in the catalog and the floor displays available in the distributors are for reference only.

FOREST LEGEND

3 types of aging

The Forest Legend collection owes its unique character to such aging processes as: **obtaining saw marks perpendicular to the grain of the board, planing, embossing**, as well as brushing, oil-waxing and four-sided bevelling. Thanks to these treatments, we accelerate the natural aging process of wood, obtaining a unique texture on the surface of the oak boards.

The new Forest Legend series of hardwood floor is an appreciation of the majesty of old-growth forests. Its character shaped by time. A primal power that allows it to endure despite adversity.

Discover its history, be part of the future. Discover the Forest Legend collection from Jawor-Parkiet.

VINTAGE

series

Vintage Series

— individualism and courage

Contemporary design is a search for harmony. Surrounding ourselves with objects, colors, and textures that reflect our personality. For this purpose, we mix styles, combine accessories, and furniture from different eras. We always look for solutions that are surprising and completely different from any other. Because our home should express us. Instead of choosing safe solutions, we are more willing to experiment in order to create interiors in which we will feel good and comfortable. Our interiors are supposed to create complete unity with their users.

This is why we created the Vintage Series. Each of the decors consists of three types of elements with a different surface finish structure, ranging from brushing and original planing to delicate saw marks. Playing with these textures and contrasting unique color differences allows us to achieve a unique effect. Thanks to the use of diverse designs in one decor, products from the Vintage Series do not look good only on the floor. They are more often used on walls, ceilings, and as headboards.

The Vintage collection is ideal for brave and imaginative people looking for unusual arrangement combinations. This flooring makes it possible for you to combine the old and the new and mix glass with brick and steel. We use light to highlight the most interesting aspects of these materials and textures.

Available in following dimensions:

thickness: 13 mm
width: 70 mm
length: 1200 mm

Product recommended for underfloor heating

What makes Vintage Series special?

Each decor consists of elements with three different types of surface finishes:

V4 bevelling

It consists in creating a gentle cut in all four edges of a floorboard. It emphasizes the shape of the boards and visually exposes their individual elements.

4 layers of oil-wax

Oil-wax penetrates the structure of the wood, emphasizing its natural beauty and protecting the floor at the same time.

Brushing

Precise brushing of the soft parts of the grain emphasizing the natural patterns of wood and providing the effect of delicate floor aging.

Planing

Our original method of planing the surface gives it a slightly rustic character. This process is intended to emphasize the natural structure of wood.

Gentle transverse saw marks

Subtle and perpendicular saw marks created toward the edge of the cut on the surface. They create an irregular structure, giving the floor an intriguingly raw character.

Wood is a naturally unique material. The actual appearance of the ordered products may vary.

**DOBRY DESIGN
2020**

The FertigDeska Chevron
Dąb Color Alabastro received the main award in the
“Floors and Walls” category during the Dobry Design
2020 competition.

The best products of the year in terms of their design
are selected by a jury of 150 architects
and interior designers.

French herringbone Chevron

French kings and aristocrats were delighted with wooden flooring arranged in the French herringbone pattern as early as in the 16th century. The pattern captivated them because of its precise and symmetrical form and added a refined elegance to any interiors. It is making a comeback to the showrooms in a modern and functional version, namely the Chevron flooring. The individual elements of the floor are trimmed on the shorter sides at an angle of 45°, forming the shape of an arrowhead. Cutting the boards at the production stage allows for a significant reduction of the installation process and guarantees high quality even in the case of the most complicated patterns, which would be difficult to obtain by trimming each element separately. This floor does not require sanding, filling, or lacquering and can be used immediately after its installation.

COLOR[®]

INSPIRATION

Whoever discovers the charms of Italy will forever remain bound to this country. From the sandy beaches of the divine Sardinia, the sun-scorched olive groves of Tuscany, and Italy's volcanic islands, to the rugged, rocky slopes of the Alps, Italian landscapes have been an inspiration for centuries. They inspired us to create Color Inspiration – a palette of decors including raw oak with white and gray shades as well as a mixture of deep browns and black.

Photographs brought from holidays will make you smile for years. They are your memories of unforgettable moments, flavors, and people you met while being there. They enable us to remember the aroma of slowly sipped espresso in a small cafe on Lake Garda or the best Amarone in Venice. Just like these travel photos, oak flooring in its original colors brings back the best moments of your life, keeping the stories of all the household members on the surface.

COLOR[®]

INSPIRATION

The Color Inspiration collection of oak boards finished with pigmented oil-wax or ultra matt Fusion Hybrid coating and inspired by the landscapes of Italy gives an almost unlimited possibility of interpretation. The use of one of our sixteen decors on the selected format of Jawor-Parkiet floors allows you to personalize your floor and get the final effect that you will enjoy for many years.

Step I

Choosing a decor from the Color Inspiration palette

Step II

Choosing collection

You can select a decor for the following Jawor-Parkiet floor collections:

Step III

The selection of grading and finish

The entire Color Inspiration collection is available in the Elegance, Classic or Country gradings. You can find more details in our authorized distributors.

Fusion Hybrid

A fusion of nature and aesthetics with functionality, revolutionary technology of protection for Jawor-Parkiet wooden floors.

If you are about to choose a hardwood floor, you must ask yourself the fundamental question: lacquer or oil-wax finish?

A unique blend of oil-wax and lacquer, the new, revolutionary **Fusion Hybrid** coating is the answer to all these needs. The coating builds on the best qualities of both formulas used so far to ensure even better protection of hardwood floors during production. Thanks to the latest technology, **6 times more coating** can be applied to the surface compared to floor finished with standard oil-wax. The manufacturer's studies have shown that Fusion Hybrid is **14 times more resistant** to abrasive wear than the regular oil-wax coating, offering improved mechanical damage durability.

The new coating is eco-friendly and does not contain any solvents or harmful substances, which makes it safe for persons with allergies, children and pets. A unique open-pore, super-matt hybrid finish which preserves the natural qualities of a wooden surface – penetrating the surface of the wood brings out its natural qualities.

FERTIGPARKIET

Oak Country

FERTIGPARKIET

FertigParkiet

FertigParkiet is finished, lacquered, or oil-waxed parquet flooring whose success lies in its two-layer structure. It consists of an elegant 6 mm (oak) or 3.6 mm (ash) thick top layer. The bottom layer, called the underlay, is made of hardwood or softwood. The use of the underlay facilitates the installation process and provides the floor with additional protection against natural wood movement and its deformation. Due to its design, this product is recommended for use with underfloor heating.
